

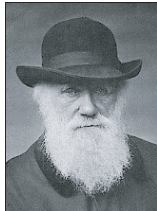

Map Kinase, Rel, Hedgehog, TNF, Wnt,  
Steroid, TGF $\beta$  Signaling Pathways

NFATc family not found

NFATc family appear coincident  
with recombinational immune system,  
complex nervous, cardiovascular systems,  
skeleton other organs and new ligands and  
receptors that control their development:  
TCR, BCR, neurotrophins, VEGF  
Ephrins, and others.
